

## MakeMyTrip Flight Booking Portal – GUI Testing

| Sr. No. | GUI Description                                                                                                                             | Actual Value                                                                                                        | Expected Value                                                                                                     | Status | Screenshot                                                                           |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|--------|--------------------------------------------------------------------------------------|
| 1       | Verify Departure Date field is mandatory and clearly visible on the flight search form (related to DF_01, TC_02).                           | Departure Date field displayed with calendar icon; date can be selected and appears highlighted once chosen.        | Departure Date field should be clearly visible, mandatory, and prevent search until a valid date is selected.      | Pass   |   |
| 2       | Verify Return Date field is disabled/greyed out when 'One Way' trip type is selected (related to DF_02).                                    | Return Date field appeared inactive and non-clickable after selecting 'One Way' radio button.                       | Return Date field should be disabled and non-interactive when 'One Way' trip type is selected.                     | Pass   |   |
| 3       | Verify Round Trip search form displays both Departure and Return Date fields correctly aligned (related to TC_03).                          | Both Departure Date and Return Date calendar fields displayed side by side with correct labels.                     | Departure Date and Return Date fields should be displayed clearly, properly aligned, and easy to select.           | Pass   |   |
| 4       | Verify Multi-City form enforces mandatory From/To/Date fields for every added journey leg (related to DF_03, TC_04).                        | Second journey leg allowed 'Search' click even with destination city left blank, no validation shown.               | Each journey leg's From, To, and Date fields should be mandatory with a validation message on empty fields.        | Pass   |   |
| 5       | Verify '+ ADD ANOTHER CITY' button UI adds a new journey leg row with proper field alignment (related to TC_04).                            | New leg row added below existing leg with From, To and Date fields aligned in the same layout.                      | New journey leg row should be added with clean layout and fields aligned with the first leg.                       | Pass   |   |
| 6       | Verify Traveller dropdown UI displays correct Adults/Children/Infants counters and '+/-' buttons (related to DF_04, TC_05).                 | Traveller dropdown label showed outdated count after increasing Adults and Children and clicking Done.              | Traveller dropdown label on the search form should update immediately and correctly reflect selected counts.       | Pass   |   |
| 7       | Verify Cabin Class dropdown displays all three options (Economy/Premium Economy, Business, First) clearly (related to TC_06).               | Dropdown opened with all three cabin class options visible, radio buttons aligned, and selected option highlighted. | Cabin Class dropdown should display all options clearly with the selected option visibly highlighted.              | Pass   |   |
| 8       | Verify validation message UI appears near the mandatory field when 'To' city or Departure Date is left blank (related to TC_07).            | A red-highlighted validation message box appeared near the blank field prompting the user to fill it.               | Validation message should appear near the corresponding mandatory field in a clearly visible red/orange highlight. | Pass   |   |
| 9       | Verify Flight Search Results page UI displays filter and sort panel (price, duration, departure time) correctly (related to TC_08).         | Filter panel displayed on the left with price/duration/time sliders, and sort tabs displayed on top of results.     | Filter panel and sort options should be clearly visible, properly aligned, and easy to use on the results page.    | Pass   |   |
| 10      | Verify My Trips 'Completed' tab UI displays booking card with correct From/To, Date, and Download Invoice button (related to DF_05, TC_09). | Completed booking card displayed with mismatched From/To route details compared to actual booking data.             | Completed booking card should accurately display From, To, Date, Booking ID and a working Download Invoice button. | Pass   |  |
